

PC Matic PRO

Customer Case Study

Who Protects the Police? Dawes County Sheriff chooses PC Matic Pro

Customer:

Dawes County Sheriff's Office

Industry:

Police Department

Location:

Chadron, NE

Previous Security:

Symantec, AVG

“We cannot afford to have much of the information we have on our computers, accessed or damaged. And ransomware... The last thing we need is anything like that. So I was looking for something I could trust.”

- Karl Dailey, Dawes County Sheriff

It's All About Protection and Service

At PC Matic, we understand the importance of securing and maintaining smooth operation for the people that depend on us. With nearly 10,000 citizens depending on Dawes County Police to protect them, and keep things running smoothly, Sheriff Karl Dailey understands that too. When it comes to security and productivity, Dawes County Sheriff's Department depends on PC Matic Pro to keep their endpoints secure, maintained and up-to-date.

Making the Switch

Before PC Matic Pro was available, Sheriff Dailey was using Symantec, then switched to AVG. “My computer guy put Malwarebytes on one of the machines, and it came up with like 3000 bad things; things that were not being caught by Symantec or AVG. Now that we have Pro, I still have Malwarebytes on some of the machines. I run it periodically, and it always comes up zero.” Karl continued, “I love it. The price is fantastic. I get great protection; especially working with tax dollars.”

Since PC Matic Pro

Sheriff Karl Dailey, on PC Matic Pro: “As most people know, the internet is ripe with hazards. Because of the nature of how we use our computers, for very detailed and personal information, we needed to protect it as best we could. I had PC Matic at home, and it did a great job. I never had a problem with any of my computers so I wanted to give it a try on my office ones. I'm tickled to death with it. I really like it. We've had zero problems with our machines, since we put it on.”
